Explain.	<div style="text-align: center;">_____</div> <div style="text-align: center;">—</div> <div style="text-align: center;">_____</div> <div style="text-align: center;">—</div> <div style="text-align: center;">_____</div> <div style="text-align: center;">—</div>
4. How do you reproduce?	<div style="text-align: center;">_____</div> <div style="text-align: center;">_____</div>
5. What color are you?	<div style="text-align: center;">_____</div> <div style="text-align: center;">—</div>

Biosphere Mix-up–Fix-up

As you know, Polly has her fun by giving you clues.
Read the descriptions of the biospheres below. Then,
write the name of the correct biosphere on the line.

1. It has different areas, or zones. Forests are the lowest zone. Farther up is a zone of small plants. Snow covers the top, which is very cold.

2. It's hot all year round. Every afternoon there's a rainstorm. Lots of lush green trees and plants are the result. Many animals live here.

-
3. The nights are usually cold and clear. The days are burning hot. The sand blows into dunes.

-
4. Large water-filled hollows in the earth's crust. Home to many plants and animals.

-
5. Dry, grassy plain dotted with trees and shrubs. Home to many large animals, including elephants, zebras, and lions.
